LOOKBOOK

# MODERN & MUTED

Creamy whites, sand, and ivories create an effortlessly chic affair that is both current yet timeless. Keep it all neutral or accent with natural earth tones, blacks, or terracottas for a pop of color that coordinates with our space.

A rustic outdoor lounge area is set up in front of a large, dark wooden barn. The barn has a steep gabled roof with exposed wooden beams and a decorative wooden sunburst ornament in the center. String lights are draped along the roofline. In the foreground, there is a green velvet sofa with white pillows, two light-colored wooden armchairs, and a round wooden coffee table. A large bouquet of white flowers sits on the coffee table. The entire setup is on a light-colored rug. The background shows a hillside with green trees under a blue sky with clouds.

# EVERGREEN

Playing off the abundance of living plants in our space, this colorway pulls in rich emeralds, olives, seafoams, and grassy greens for an elegant and natural feel.

Coordinating with our historic 1930's brick, varying shades of earthy terra cotta, brick, and creams make for a warm and inviting aesthetic that coordinates perfectly with the surroundings.

# PASTELS

Whether its soft hues of pink tones or layers of blues, purples, greens, and yellows, we love a good pastel color scheme to keep things light and airy!
